DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9 and 17-27, drawn to a method for determining LDL cholesterol, a method for determining HDL cholesterol and LDL cholesterol, a reagent for determining LDL cholesterol and a reagent kit for determining LDL cholesterol and HDL cholesterol.

Group II, claims 10-16, drawn to methods of determining HDL cholesterol and total cholesterol.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: it is considered that groups I and II lack a corresponding technical feature. The special technical feature of group I is considered to be the reagent which enables the CH enzymes to act only on LDL cholesterol; this technical feature is not recited in the invention of group II. Additionally, the special technical feature of group II is considered to be the combination of a reagent enabling CH enzymes to act only on HDL cholesterol and a reagent enabling CH enzymes to act on cholesterol in all lipoproteins. This specific technical feature is not recited in the invention of group I.
